

4-2-24

- New geometry from Win implemented
- Resolution study with window and without window
- “With window” run consistent with previous geometry ($\sigma=119\text{keV}$)
- Without window - no improvement on resolution ($\sigma = 124\text{keV}$)
- Without window with same transfer matrices as “with window” run - improvement ($\sigma=103\text{keV}$)
- Error compiling most recent changes
- Documentation written to run resolution studies

With Aluminum Window

Without Aluminum Window
