

Exclusion plot update

Laura
October 22nd 2024

Updates since last time

- Reran central momentum optimization with higher statistics:
 - For 13@30 setup: 11 MeV for the e- arm, 17.2 MeV for the positron arm
 - For 17@50 setup: 24.6 MeV for both arms
- Updated mass resolution from 125 keV to 60 keV

Old (left) and new (right)
