

Exclusion Plot Updates

Laura
September 28 2026

TLDR

- No more wiggles
- Plots done assuming 150uA of current, 1000h of run time
- Old mass resolution of 60 keV looks the same as previous plots just less bumpy
- Updating to 120 keV looks bad
- Running the plots with longer run times to see if we can get similar reach

Mass resolution of 60 keV

Mass resolution of 120 keV
