

GEM:

- Channel masking, cluster charge vs trigger rate study: Manju
- GEM current vs trigger rate, efficiency calculation with 3 GEM cosmic stand at JLab: Dulitha
- Skipping the 11/6 channels from the first and last APV, gain calibration, clustering in gemControl: Ryan
- GEM timing: Dean
- Clustering in GEMini and with ML: Sid

Trigger

- Data blob decoding, rough timing calibration, updated output tree: Win
- Continue development of trigger plugin and diagnosis plots: Win, Logan

Simulation

- Survey and detector position: Laura, Dean, Doug, Win
- Detector simulation and digitization: Win, Evan
- Background events: Laura
- Generator updates: Laura, Win
- Code clean up: Win

Calibration

- Elastic peak vs Magnetic field: Win, Ethan, Sid
- Inelastic states: Win, Ethan, Sid

Reconstruction

- Detector efficiency and hit correlations: Win, Dean, Ethan, Mahmoud, Dulitha, Ryan
- Track plugin maintenance and update: Sid
- Vertex and mass reconstruction: Sid, Xavier, Jan, Win

Moller scattering

- Initial comparison of data and simulation: Ethan
- Beam rate study, luminosity calculation: Ethan, Jan

RunDB

- Created, need to run over all runs: Ethan

Reconstruction

- Detector efficiency and hit correlations: Win, Dean, Ethan, Mahmoud, Dulitha, Ryan
- Track plugin maintenance and update: Sid
- Vertex and mass reconstruction: Sid, Xavier, Jan, Win

Moller scattering

- Initial comparison of data and simulation: Ethan
- Beam rate study, luminosity calculation: Ethan, Jan

RunDB

- Created, need to run over all runs: Ethan

Paper!

- Simulation paper and reconstruction paper in progress
